

OEM Replacement for Beckett Switchless Oil Burner Motor

Stock No. OBK6002V1

Features:

- PSC Design
- 1/7 HP
- 115 Volts
- 3450 RPM
- 1.8 Amps
- CCWLE Rotation
- Shaft: 1/2 x 1-13/16
- Ball Bearing Construction
- 48M Flange
- Long 18" Leads
- Thermally-Protected-Automatic
- UL Recognized
- Cooler Operation - Longer Life
- Direct OEM Replacement

Replaces:

Beckett 21805U

Carlin 98022S

Marathon 0701

Emerson 3248

AF/AFG Burners

B2001, B2002, B2003, B2004 Chassis

5-Year Warranty!

"A. O. SMITH ANNOUNCES FIVE YEAR WARRANTY!"

*switchless design
+ higher efficiency*

longer life

INTRODUCING THE NEW "SWITCHLESS" OIL BURNER MOTOR

The new switchless design eliminates the use of an internal starting switch and governor for greater dependability.

Use of a PSC design allows for higher efficiencies with 40% lower amp draw. Cooler operation results in fewer failures and reduced service calls. Ball bearings provide smooth, quiet operation and extended motor life.
